Professional Summary

Computer Science undergraduate with experience in developing and deploying full-stack web applications. Skilled in technologies like React, Next.js, Firebase, and MongoDB. Growing foundation in data structures and algorithms with LeetCode and other platforms.

Education

Vellore Institute of Technology, Bhopal B.Tech in Computer Science	Sept 2023 – Present CGPA: 8.65. Coursework includes programming, Computer Systems
St. Aloysius Sr. Sec. School, Jabalpur HSC (CBSE) 89%. Focused on Physics, Chemistry, and Mathematics .	May 2023
St. Aloysius Sr. Sec. School, Jabalpur SSC (CBSE) 93%. Completed foundation courses in mathematics and general sciences.	May 2021

Technical Skills

- Languages: C/C++ (used for DSA and system-level tasks), Python (data handling and scripting), SQL (database queries), JavaScript (web interactivity), HTML/HTML5, CSS
- Frameworks: React.js (for dynamic UI), Node.js and Express.js (server-side logic), Next.js (routing and rendering), MongoDB (NoSQL storage)
- Tools: Git/GitHub (version control), VS Code (IDE), Tailwind CSS (responsive styling), Firebase (back-end services), Canva (UI mockups), Google Colab (collaborative scripting)

Projects

Tech Tangle — Next.js, Firebase, React, Tailwind CSS, TypeScript

- Built a full-stack web app supporting 150+ daily users to solve DSA problems across different topics and difficulty levels.
- Integrated real-time code execution playground using CodeMirror and Assert, enabling users to test code against multiple cases.
- Implemented Firebase Auth for secure login and Firestore for real-time storage of user submissions, bookmarks, and attempts.
- Added an intelligent AI assistant to help users with hints, improving average question-solving time by 40%.
- Boosted retention with gamified features: upvote/downvote buttons, rating system, and visual progress tracking on dashboards.

Interview Nest — Next.js, React

- Developed job preparation portal used by 100+ students weekly with detailed routing structure and modular architecture.
- Used SSR and SSG for SEO optimization, improving visibility of platform on search engines and reducing load time by 35%.
- Deployed on Vercel with CI/CD, enabling frequent updates and automatic rollbacks on failed deployments.

Ignite Fitness — HTML, CSS, Django, SQL, Gemini API

- Engineered a scalable Django platform to manage fitness data of 200+ gym members, including trainer sessions and fee tracking.
- Built role-based access for administrators, receptionists, and trainers to maintain secure workflows.
- Used Gemini API for dynamic backend tasks including automated billing notifications and member data logging.

Password Manager — React, Tailwind CSS

- Created local password manager storing 256-bit encrypted strings, useful for 50+ logins across platforms.
- Enabled edit, delete, and copy to clipboard functionality, improving task speed by over 60%.
- Built responsive layout with Tailwind, tested on devices ranging from mobile phones to large desktops.

Certifications Coursework

- Certifications:
 - Google IT Support Professional Certificate — trained in system administration, networking fundamentals, OS management, and technical troubleshooting. Verification: Credly Link
 - Bits and Bytes of Computer Networking (Coursera). Verification: Coursera Certificate
- Coursework: Data Structures, Analysis of Algorithms, Object-Oriented Programming, Artificial Intelligence, Operating Systems, Database Management Systems. Focus on real-world applications and efficient design patterns.
